

EXPERIENCE ROWPRO 4

Another great step forward for RowPro users

RowPro just got a whole lot better. The all-new 3D graphics in RowPro 4 bring a new level of realism that feels like you're really out on the sparkling water.

You can install and run RowPro 4 in Windows 8, and along with some under-the-hood upgrades, RowPro 4 is the platform for the future.

And RowPro 4 brings the best experience yet to online rowing, with a new release of the popular Oarbits App and important stability improvements for online rowing.

ALL-NEW 3D GRAPHICS

Everywhere you look there's something new:

1. Completely new male and female rowers (the Oarsman) with far more lifelike appearance, a new pro rowing uniform, and improved stroke technique including wrist action on the oars.
2. A brand new and much more elegant and realistic Pro-Am Elite boat and Concept2 oars.
3. A completely new rowing course with more detailed and realistic trees, shoreline and land, together with the existing live water introduced in RowPro 3.
4. Brand new scene lighting to give a subtle and life-like appearance to the new rowers, boats, oars and scenery.

See the [All-new 3D Graphics](#) mini-guide for more info.

PLATFORM FOR THE FUTURE

Recommended Upgrade

Digital Rowing recommends that all current users of RowPro upgrade to RowPro 4 for the following reasons:

1. RowPro 4 has been upgraded to install and run in Windows 8. Earlier versions of RowPro do not install and run correctly in Windows 8. Note: RowPro 4 also installs and runs in Windows 7, but can not be installed in earlier versions of Windows.
2. RowPro 4 is the platform Digital Rowing will use for its future developments, including a number of important developments described in the Platform for the Future mini-guide.

Note: All 4.x upgrades will be free of charge once you have upgraded to RowPro 4.

See the [Platform for the Future](#) mini-guide for more info.

IMPROVED ONLINE ROWING EXPERIENCE

RowPro 4 brings the best experience yet to online rowing

RowPro 4 includes:

1. Important bug fixes that greatly improve the stability of the online rowing system for everyone who rows online.
2. Much improved 3D graphics that make rowing online with others so much more realistic than ever before.
3. A much improved oarbits App for iOS and Android that's now the tool of choice for scheduling and joining online rows and checking participants and results wherever you are.

See the [Online Rowing with RowPro 4](#) mini-guide for more info.

UPGRADING TO ROWPRO 4

There are just 3 easy steps to upgrade from earlier versions of RowPro

1. Upgrade your RowPro license from v1, v2 or v3 to v4.
2. Upgrade the RowPro software to RowPro 4.
3. Activate RowPro 4 with your upgraded RowPro v4 license.

See the [Upgrading to RowPro 4](#) mini-guide for step-by-step instructions.

UPGRADE PRICING AND ELIGIBILITY

Eligibility for upgrade pricing:

- If you purchased or upgraded to RowPro 3 after 1 May 2013, your license is already v4 and doesn't need to be upgraded.
- If you have a RowPro Home, School or Gym Edition v1, v2 or v3 permanent license, you can upgrade it to v4 for \$39 for a limited time.
- If you have a current RowPro Home, School or Gym Edition annual license, your license doesn't need to be upgraded.
